

Training **Advanced**

Duration: 8 hours, from 09:00 am to 05:00 pm (including coffee and lunch breaks)

The hands-on advanced training focuses on the efficient handling of **CadnaA**. All techniques that are essential for your efficient daily work, like import of data from different sources, massive modifications, use of conditions and project management, are discussed and trained in detail by use of examples.

The training has been designed in such a way that participants will practice every topic by means of simple **CadnaA** files.

Essential information

Target user group	Training methodology	Training materials
CadnaA users who completed the CadnaA Basic Training or equivalent knowledge.	<ol style="list-style-type: none"> 1. Short introduction to the topic 2. Practice step-by-step 3. Explanation by the trainer 4. Summary and Short Q&A 	<ul style="list-style-type: none"> <input checked="" type="checkbox"/> CadnaA License on the latest version <input checked="" type="checkbox"/> CadnaA Training book (pdf format) <input checked="" type="checkbox"/> CadnaA Files <input checked="" type="checkbox"/> Training Certificate (pdf format)

Contents*

Advanced import of Third-party files	Import from AutoCAD DXF Import from ESRI-Shape files Import from ASCII files (Objects, Spectra and DTM) Import from MS Excel (ODBC)
Advanced object handling	Massive modification of objects Modifications based on attributes Conditions Memo-text variables Operation with strings
Project organization	Object Tree. Definition and assignment of objects Multi-selection tool Variants Attributes per variant Groups Creation and analysis of scenarios (Sound power levels, partial levels)
Presentation of results	Advanced 3D Presentation (Skybox, 3D-Models, video walk through) Building up a results table from scratch

* The contents of the training as well as the duration of each topic may be different depending on specific requests or interests of the attendees
